Stvaranje veze

Ukoliko ste ponovno instalirali/formatirali Vaše računalo, slučajno izbrisali (već stvorenu) vezu, ili dobavili (novo) računalo koje jos nije podešeno za spajanje na internet (koristeći NOVI-NET uslugu wDSL/wDSL Pro), potrebno je jednokratno stvoriti (novu) vezu, koja će Vam omogućiti buduće spajanje na internet.

1. Kliknite na **START** -> **Settings** -> **Control Panel** kao što je prikazano na slici

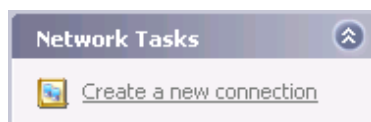

2. Ovisno o postavkama, otvorite **Network and Internet Connections**, zatim **Network Connections**

ili otvorite **Network Connections**

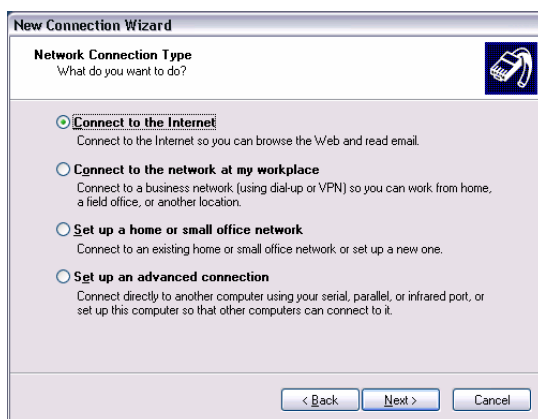

3. U izborniku **Network Tasks** (s lijeve strane) izaberite **Create a new connection**

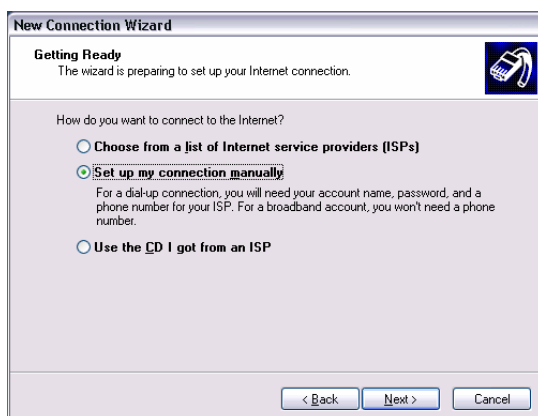

4. Sada će Vam se pojaviti prozor u kojem piše *Welcome to the New Connection Wizard*, te kliknite **Next** za nastavak na slijedeći korak

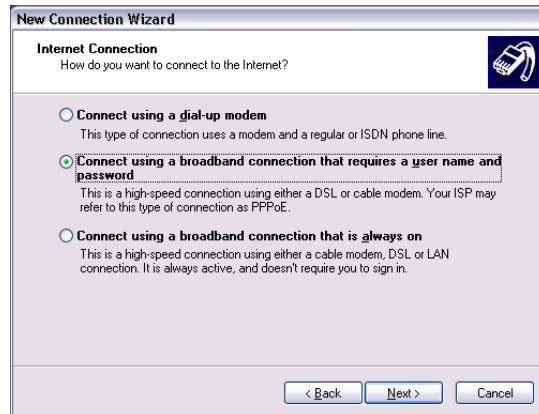

5. U prikazanom izborniku izaberite prvu stavku *Connect to the Internet* i zatim kliknite **Next**

6. Ovdje izaberite drugu stavku *Set up my connection manually* i zatim kliknite **Next**

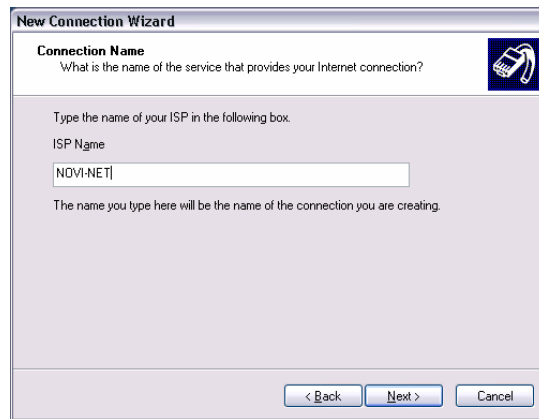

7. U ovom prozoru izaberite drugu stavku **Connect using a broadband connection that requires a user name and password** i ponovno kliknite **Next**

The screenshot shows the 'New Connection Wizard' dialog box with the title 'Internet Connection'. The question is 'How do you want to connect to the Internet?'. There are three radio button options: 'Connect using a dial-up modem', 'Connect using a broadband connection that requires a user name and password' (which is selected), and 'Connect using a broadband connection that is always on'. Each option has a brief description. At the bottom, there are buttons for '< Back', 'Next >', and 'Cancel'.

8. U polju ispod **ISP Name** unesite željeno ime za ovu vezu (npr. **NOVI-NET** ili **WDSL**) te kliknite **Next**

The screenshot shows the 'New Connection Wizard' dialog box with the title 'Connection Name'. The question is 'What is the name of the service that provides your Internet connection?'. It asks to 'Type the name of your ISP in the following box.' and shows an input field with 'NOVI-NET' entered. Below the field, it says 'The name you type here will be the name of the connection you are creating.' At the bottom, there are buttons for '< Back', 'Next >', and 'Cancel'.

9. U prikazanim poljima unesite Vaše podatke za spajanje * (Vaš username kod polja **User name**, te Vaš password kod polja **Password** i još jednom kod polja **Confirm password**), te kliknite **Next** (ostale postavke nije potrebno mijenjati)

* Potrebni podaci (Vaš username i password, ukoliko nije naknadno promijenjen) nalaze se na obrazcu koji Vam je izdan kod priključenja. Ukoliko ste mijenjali password ili ga neznate, molimo da nam se obratite kako bi Vam izdali novi.

The screenshot shows the 'New Connection Wizard' dialog box with the title 'Internet Account Information'. The question is 'You will need an account name and password to sign in to your Internet account.' It asks to 'Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)'. There are three input fields: 'User name' with 'username', 'Password' with '.....', and 'Confirm password' with '.....'. There are two checked checkboxes: 'Use this account name and password when anyone connects to the Internet from this computer' and 'Make this the default Internet connection'. At the bottom, there are buttons for '< Back', 'Next >', and 'Cancel'.

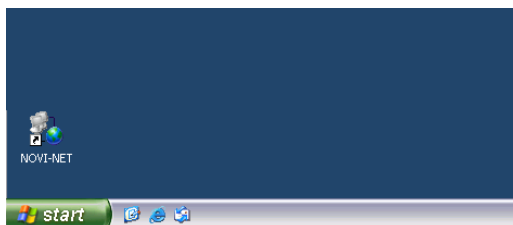

10. Ukoliko si želite olakšati buduće povezivanje, možete odabrati stavku **Add a shortcut to this connection to my desktop** i potvrdite klikom na **Finish**. Time će Vam se na radnoj površini (Desktop) pojaviti ikona koja omogućuje spajanje na internet

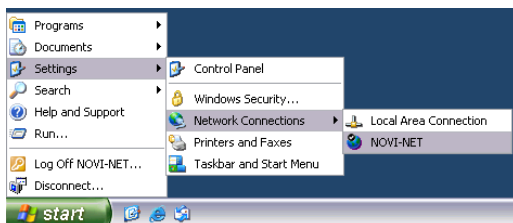

Spajanje na internet

Svaki puta kada upalite (ili ponovo pokrenete) Vaše računalo (ili kada prekinete uspostavljenu vezu), potrebno je ponovno spajanje, koje Vam opet omogućuje pristup na internet.

1. Otvorite prozor za spajanje putem ikone na radnoj površini (ukoliko ste kod stvaranja veze opisanom u koraku prije odabrali stavku **Add a shortcut to this connection to my desktop**)

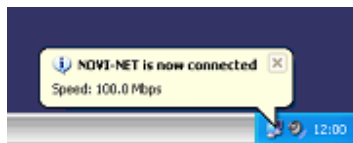

ili putem izbornika mrežnih veza (**START -> Settings -> Network Connections**)

2. U novom prozoru kliknite **Connect** kako bi ste se spojili na internet (ostale postavke nije potrebno mijenjati)

3. Kod uspješnog spajanja pojaviti će se poruka koja Vas obavještava o ostvarenoj vezi.

Time smo završili proces kreiranja veze i sada možete početi koristiti internet.

Ugodno korištenje interneta želi Vam vaš NOVI-NET Internet.
